# WITH YOUR SUPPORT, WE CONTINUE TO MAKE A POSITIVE IMPACT IN OUR COMMUNITY

At Mount Sinai Medical Center, our mission to provide high quality health care enhanced through teaching, research, charity care and financial responsibility is at the heart of everything we do. Our commitment to medical excellence and our community assures donors that we are putting their philanthropic dollars to the best use possible. This issue of *Mount Sinai Life* provides examples of how your contributions are making an impact on those we have the responsibility to serve.

## ADVANCED RESEARCH

Our cover story shares exciting news about Mount Sinai being among a select few hospitals across the nation to participate in a national research trial that investigated the effectiveness of trans-catheter valve replacement using the revolutionary CoreValve system. Dr. Joseph

Lamelas, chief of cardiac surgery, and Dr. Nirat Beohar, director of our cardiac catheterization laboratory, were our site's principal investigators. Results from the study were so positive that the U.S. Food and Drug Administration approved the procedure for extreme-risk patients, giving many people an alternative to open-heart surgery.

Patients who might not otherwise be candidates for more invasive valve replacement procedures can look forward to a new life, free of the limitations imposed by aortic stenosis. Including CoreValve, Mount Sinai provides the full range of heart valve repair and replacement options and is home to South Florida's most active valve program. In fact, Dr. Lamelas performs more valve surgeries than any other cardiac surgeon in Florida. We also offer the best cardiac surgery survival rate in Florida among adult hospitals performing the most cases.

## HIGH QUALITY HEALTH CARE

This issue also includes an article about Mount Sinai's Vascular Center, which gives patients access to advanced, minimally invasive interventions, including treatment options for peripheral artery disease (PAD). The Vascular Center includes dedicated wound healing professionals who work hand-in-hand with our vascular team to treat stubborn wounds and ulcers with the goal of sparing patients the life-changing trauma of amputation.

## OUTSTANDING PHYSICIANS

From the inception of our hospital, donors

have supported our efforts to attract highly skilled physicians who are among the best in their field of expertise. As a result, Mount Sinai's medical staff is one of the finest in Florida. We continue to recruit outstanding physicians, several of whom are featured in this issue of *Mount Sinai Life*.

## ENHANCING SERVICES FOR OUR COMMUNITY

We also feature an article on the upcoming opening of the Mount Sinai Aventura Women's Center. This new center will offer patients access to state-of-the-art diagnostic technology, including digital mammography, breast ultrasound, an open MRI, bone densitometry and more. With an exclusive waiting area and other amenities in a soothing, spa-like setting, our new Women's Center will offer greater comfort and privacy while providing a sophisticated array of services.

Plans also are under way for the grand opening of our seventh Miami-Dade location. Mount Sinai Primary & Specialty Care Sunny Isles Beach will be located at 323 Sunny Isles Boulevard. When it opens this fall, the office will offer internal medicine, cardiology and urology services.

## THANK YOU FOR YOUR UNWAVERING SUPPORT

We extend our heartfelt thanks to every member of our philanthropic family. As part of our team, you help enhance Mount Sinai's ability to support its mission to our community.

**STEVEN D. SONENREICH**

President &  
Chief Executive Officer

**WAYNE E. CHAPLIN**

Chairman,  
Board of Trustees

# SHARING A COMMITMENT TO ENHANCE THE HEALTH AND WELL-BEING OF EVERY PATIENT

One of the great things about being part of Mount Sinai Medical Center's philanthropic family is the commitment we share to making a difference in our community. When we support Mount Sinai, we know that we are helping to enhance the health and well-being of countless patients.

Our various networkers and dinner series events give us a chance to get to know one another and build camaraderie as we strengthen our ties to Mount Sinai and its mission. Among the photo galleries of Foundation events in this issue of *Mount Sinai Life*, we feature coverage of luncheons in honor of two dynamic and selfless women who have made significant contributions to the medical center. Dalia Glottmann and Shirley Harris are fine examples of enthusiastic donors who embrace our mission through their philanthropic support, and we are proud to pay tribute to

them in the pages of this publication.

This issue of *Mount Sinai Life* also includes coverage of two longstanding donor-supported programs that never fail to touch the hearts of all who participate. Established more than 40 years ago, the Sons and Daughters Scholarships are awarded annually to children of Mount Sinai employees. These young people have proven themselves to be academic achievers who also give back to the community. We know their future is bright, and we are proud to play a role in helping them reach their goals.

We also celebrated National Nurses Week by presenting awards to outstanding nurses and awarding scholarships to employees who are in nursing school. The awards program was established by the late Sidney and Ruth Harris, in honor of the nursing staff that they loved so dearly, and the scholarships are made possible through the

generosity of the late Ruth Schwartz and her son and daughter-in-law, Jerrold and Jane Goodman.

These are just a few examples of donors who have extended themselves to Mount Sinai in an extraordinary way. There are many more and we are grateful for their unwavering commitment to our medical center. I take great pride in my involvement with Mount Sinai because, like you, I know just how important it is to have a world-class hospital in our community. Our involvement has a profound impact on those served by the medical center.

Thank you for your commitment. I look forward to seeing you at upcoming events and working with you to give more people greater access to the outstanding care and services available at Mount Sinai.

**JASON S. LOEB**

President, Foundation

**ON THE COVER:** Our cover illustration shows a CoreValve system that has been placed in an aortic heart valve. Learn more about this nonsurgical option for heart valve replacement in a story that begins on page 10.

# MOUNT SINAI SALUTES SHIRLEY HARRIS

SHIRLEY HARRIS WAS IN THE SPOTLIGHT ON TUESDAY, FEBRUARY 25, IN RECOGNITION OF HER GENEROSITY IN SUPPORT OF MOUNT SINAI MEDICAL CENTER. A Benefactor in the Society of Mount Sinai and a member of the Founders Club and the Legacy Circle, Shirley has shown a tremendous level of support for the medical center. In gratitude for her most recent gift, Mount Sinai dedicated a wall in the first floor lobby of the Simon Building in honor of Shirley and in memory of her late son, Jay David Harris.

## DONORS JOIN IN THE CELEBRATION OF NURSES WEEK AT MOUNT SINAI

Mount Sinai Medical Center marked National Nurses Week by recognizing 25 outstanding nurses during an awards program on Wednesday, May 7, in the Harris Garden.

Theresa Falcasantos, of the Mother-Baby Unit, was named the 2014 Nurse of the Year. She was among the individuals named “Nurse of the Unit,” based on nominations by her colleagues and directors.

In addition, five employees received scholarships to defray the cost of their nursing school expenses. The scholarships are awarded to full-time employees on the

basis of their work and school performance and their demonstration of good customer service skills. Presented annually since 1994, the \$1,000 scholarships are made possible through the generosity of the late Ruth Schwartz and her son and daughter-in-law, Jerrold and Jane Goodman, who are members of the Society of Mount Sinai and Founders Club. Jerrold Goodman also is a member of the medical center’s advisory board of trustees.

The Nurse of the Year and Nurse of the Unit awards are made possible through the Harris Institute of Nursing, which recognizes nurses for their professionalism,

compassion and dedication to patient care. The late Sidney Harris established the institute as a way to honor the nursing staff that cared for his late wife, Ruth, during her hospitalization at Mount Sinai. The Harrises were members of the Founders of Mount Sinai and the Society of Mount Sinai. Sidney Harris also dedicated the Harris Garden, the site of the awards program, as a tribute to his wife.

2014 NURSE OF THE YEAR THERESA FALCASANTOS (LEFT) AND KAREN MOYER, SENIOR VICE PRESIDENT AND CHIEF NURSING OFFICER.

# MOUNT SINAI PAYS TRIBUTE TO DALIA GLOTTMANN

**DALIA GLOTTMANN TOOK CENTER STAGE ON FRIDAY, MARCH 21, WITH THE DEDICATION OF THE GLOTTMANN FAMILY SCULPTURE COLLECTION.** Situated in the hospital's Harris Garden, the sculptures are priceless pieces of art that once graced the garden of Dalia and her late husband, Saul, at their home overlooking beautiful Biscayne Bay. Benefactors in the Society of Mount Sinai and members of the Founders Club, The Cancer Lifeline (TCL) and the Ambassadors of the Wien Center, Dalia and Saul are longstanding members of Mount Sinai's philanthropic family. Saul also served as Founders Club president and a member of the board of trustees, while Dalia is a past TCL president, and she continues to be an ardent supporter of the medical center.

## FOUNDATION AWARDS SONS AND DAUGHTERS SCHOLARSHIPS

The Mount Sinai Medical Center Foundation awarded college scholarships to 30 children of Mount Sinai employees during its annual Sons and Daughters Scholarship Awards presentation on Tuesday, June 10, in the Founders Dining Room.

Now in its 41st year, the program recognizes students for their academic achievement, extra-curricular activities, writing skills and community service. The scholarship committee reviewed 94 applications and presented \$2,000 scholarships to 30 students, for a total of \$60,000 in awards.

Steven D. Sonenreich, Mount Sinai's president and chief executive officer, praised the students for their academic accomplishments and commended their parents for their dedication.

Sonenreich introduced Allison Valdez, who accumulated the highest score in the selection process and delivered the keynote speech during the program. Other speakers included Foundation President Jason Loeb; Membership Club Co-chairs Linda Levy and Marco Cerenko; Scholarship Committee Co-

chairs Eric Berman and Mindi Marbin; and members of the scholarship committee.

POWER FOOD:

# ALL HAIL Kale

This distinctive, good-for-you veggie is ready for its close-up.

CRINKLY KALE, A COUSIN TO CABBAGE AND CAULIFLOWER, WAS RECENTLY CALLED "THE HOTTEST VEGETABLE ON THE SCENE." BUT IT'S NOT NEW. ONE OF EUROPE'S MOST COMMON GREEN VEGETABLES IN THE MIDDLE AGES, KALE WAS LATER PROMOTED AS AN EASY-TO-GROW SOURCE OF NUTRIENTS FOR ENGLISH GARDENERS IN WORLD WAR II, WHEN RATIONING MADE MANY FOODS SCARCE. TODAY, KALE IS PRIZED AS A NUTRITIONAL POWERHOUSE.

## DID YOU KNOW?

Many varieties of flowering kale are used as ornamental plants, with leaf colors ranging from blue and lavender to pink and red. Kale can grow well into winter, and it's the cold that intensifies these hues. The frilly leaves are edible, but the decorative foliage isn't as tasty as culinary kale.

## POWERS

Kale may look too pretty to eat, but this super-crisp green can do much more than serve as a bright bed for shrimp cocktail. A two-cup serving of kale provides more than 250 percent of your daily requirement of vitamin A, 250 percent of vitamin C and 20 percent of vitamin B6 – all this for less than 70 calories! Kale is also rich in vitamin K, carotenoids, calcium, riboflavin, niacin, magnesium, iron, sulphur and phosphorus. It also offers more than 45 flavonoids (antioxidants), as well as cholesterol-lowering properties.

## BUY • STORE • SERVE

Curly kale is the most readily available variety – stocked at almost all grocery stores and local farmers' markets. It has a lively, pungent flavor, and its texture is ideal for making kale chips (see recipe at right). The second most popular variety is dinosaur or lacinato kale. It has tall, dark, narrow leaves and a wrinkled texture, and it's slightly sweeter and more delicate than the curly kind. When buying kale, choose small to medium, deep green leaves, because small leaves will be more tender and milder-tasting than large ones. Store it in a plastic bag in the coldest part of the fridge for three to five days, and don't wash it until you are ready to prepare it.

Kale is one of the few leafy greens that you can eat raw, sautéed, steamed, boiled, fried or baked. It's often served in soups, pasta and stews. Try presenting it as a hearty side dish. To ensure even cooking, chop the leaves into 1- to 2-inch pieces, and steam on low heat for about 10 minutes or until tender. Enjoy!

## RECIPE

### Roasted Kale Chips with Parmigiano-Reggiano

*Courtesy of Whole Foods Market*

## INGREDIENTS

- 1 bunch of curly kale
- 1 tablespoon extra-virgin olive oil
- ½ teaspoon chili powder
- ¼ teaspoon kosher salt
- 2 tablespoons finely grated Parmigiano-Reggiano cheese

## PREPARATION

Preheat oven to 350° F. Line two baking sheets with parchment paper. Trim tough stems from kale and discard; cut leaves into 2-inch pieces. Place in a large bowl, drizzle with oil and toss. Add chili powder and salt and toss again. Arrange kale on sheets in single layer; bake until it's crispy and the edges begin to brown, about 12 minutes. Remove from oven; let cool for 2 minutes. Transfer to a bowl and toss with cheese. Store in an airtight container for up to five days.

# MOUNT SINAI OFFERS THE FULL GAMUT OF VALVE REPLACEMENT OPTIONS

IN ADDITION TO  
CONVENTIONAL AND  
MINIMALLY INVASIVE VALVE  
REPLACEMENT PROCEDURES,  
MOUNT SINAI  
OFFERS THE  
**COREVALVE  
SYSTEM** AS A  
NONSURGICAL  
OPTION FOR  
EXTREME-RISK  
PATIENTS.

# PATIENT IS BACK ON THE TREADMILL AFTER INNOVATIVE, NONSURGICAL HEART VALVE REPLACEMENT PROCEDURE

**MEDTRONIC COREVALVE SYSTEM OFFERS FEWER COMPLICATIONS, A SHORTER HOSPITAL STAY AND FASTER RECOVERY**

**JOSEPH KRINSKY, SHOWN HERE WITH HIS WIFE, EMILY, EXPERIENCED A SIGNIFICANT IMPROVEMENT IN HIS QUALITY OF LIFE WHEN HE HAD NONSURGICAL VALVE REPLACEMENT USING THE COREVALVE SYSTEM.**

Joseph Krinsky and his wife, Emily, were wintering in Miami Beach when he learned that he needed to have his aortic valve replaced due to aortic valve stenosis.

His doctor back home in Michigan told him that a new nonsurgical valve replacement procedure was too risky to try because it was still under clinical trials, but Krinsky decided to follow his heart. Believing in the expertise of his doctors at Mount Sinai Medical Center, he chose to undergo the procedure.

"I decided Mount Sinai was the best place for older people," said Krinsky, who was

**NIRAT BEOHAR, M.D., DIRECTOR OF THE CARDIAC CATHETERIZATION LABORATORY, PERFORMED JOSEPH KRINSKY'S VALVE REPLACEMENT PROCEDURE USING THE MEDTRONIC COREVALVE SYSTEM.**

84 years old when he had the procedure in February 2013. "They had the most experience."

At the time, Mount Sinai was one of only 45 sites in the United States participating in the Medtronic CoreValve U.S. Pivotal Trial, a landmark study focusing on high-risk patients – those predicted to have more than a 15 percent chance of death from open-heart surgery within 30 days. Results from the study were so positive that in January 2014, less than one year after Krinsky's procedure, the U.S. Food and Drug Administration (FDA) approved the procedure for extreme-risk patients, giving many people a safer alternative to open-heart surgery.

The American Heart Association estimates that more than 5 million Americans are diagnosed with heart valve disease every year. Aortic stenosis is a common problem caused by a narrowing of the heart's aortic valve due to excessive calcium deposited on the valve leaflets. When the valve narrows, it does not open or close properly, making the heart work harder to pump blood throughout the body. Eventually, this causes the heart to weaken and function poorly, which may lead to heart failure and increased risk for sudden cardiac death.

Essentially a stent with a valve sewn into it, the CoreValve System is delivered to the heart via a catheter that is passed through a small incision in the groin area and guided through the arteries to the site of the diseased valve. Once in position, the CoreValve expands into the place of the diseased valve and takes over its function. Patients who participated in the study experienced significant improvements in their quality of life. In addition, they had fewer complications, shorter hospital stays and quicker recoveries.

Nirat Beohar, M.D., director of the cardiac catheterization laboratory at Mount Sinai Heart Institute and a member of the the Columbia University Division of Cardiology at Mount Sinai, performed

Krinsky's procedure, with outstanding results.

"I had the surgery on Monday and I went home that Wednesday," Krinsky said. By the following Monday, he was back on the

treadmill, walking for 30 minutes. Within a few more days, he was back to his regular routine. "I always go to the gym about five or six times a week," he said. "I walk three and a half miles on the treadmill and then I stretch for 20 minutes. That's it."

## **MINIMALLY INVASIVE VALVE SURGERY: ANOTHER OPTION FOR HIGH-RISK PATIENTS**

For many years, standard open-heart surgery was the primary option for valve repair or replacement. This invasive procedure exposes the heart and its vessels through median sternotomy (dividing the breastbone), which requires a 10- to 12-inch incision down the chest. However, more options are available that are much less traumatic to the body.

In addition to the nonsurgical Medtronic CoreValve system for valve replacement, the Mount Sinai Heart Institute offers an advanced minimally invasive procedure perfected by Joseph Lamelas, M.D., chief of cardiac surgery. Dr. Lamelas performs more valve surgeries than any other physician

**JOSEPH LAMELAS, M.D. CHIEF OF CARDIAC SURGERY**

in Florida and offers patients among the best survival rate in the country. His minimally invasive valve procedure is done through a two-inch incision between the ribs on the side

of the chest. This approach provides much more stability to the chest wall and is more beneficial to the patient. There also is minimal scarring with this technique, and patients generally stay in the hospital for four days, as opposed to two weeks of recovery for open-heart surgery.

To learn more about minimally invasive heart surgery at the Mount Sinai Heart Institute, visit [www.miami-cardiology.com](http://www.miami-cardiology.com) or call **305.674.CARE (2273)** for a physician referral.

EXPANDED COREVALVE SYSTEM

# MOUNT SINAI VASCULAR CENTER SAVES FATHER'S LEG, HELPS HIM MAINTAIN HIS QUALITY OF LIFE

**PERIPHERAL ARTERY DISEASE (PAD) BROUGHT ON BY DIABETES HAD ALREADY TAKEN ONE LEG AND, WITHOUT PROPER TREATMENT, THREATENED TO TAKE ANOTHER**

Ask Frank Getson what means the most to him, and he'll tell you straightaway that his 14-year-old son, Hesh, a star player on his travel baseball team, is all that matters. "I live for him," Getson says. "He and I have the relationship that I had with my father. We became best friends."

Getson credits that bond with helping him get through the threat of becoming a double amputee and medical complications that almost cost him his life. The saga began four years ago when Getson, who

a podiatrist in Voorhees, New Jersey, who encouraged him to call Dr. Robert Beasley, co-director of the Vascular Center at Mount Sinai Medical Center. The Vascular Center emphasizes a team-centered approach to care, with doctors specializing in interventional radiology and cardiology, as well as specialists with expertise in advanced wound healing modalities.

"All our services are under one roof, with the specific goal of wound healing and limb salvage," Dr. Beasley says. "It's a one-stop shop for someone with a wound problem."

Tests revealed that Getson was experiencing critical limb ischemia, the most severe form of PAD.

As part of Getson's treatment, Dr. Beasley performed a minimally invasive revascularization procedure in the hospital's cardiac catheterization lab. This treatment involves guiding a catheter through an artery in the groin to reach narrowed or blocked blood vessels and widening them to improve blood circulation to the wound. He cleared two blocked arteries and inserted one stent to maintain blood flow. Getson was later placed under the care of wound healing specialists, who removed dead tissue from the wound and applied topical ointment to encourage collagen production and promote healing. He also received a vacuum-assisted closure treatment, a skin graft and other treatment to facilitate healing.

One might think that's the end of the story, but there is more. During his treatment, Getson accidentally bumped

his right heel at home and, as a result, developed another stubborn wound. Two months after his initial procedure, Getson was back in the cardiac catheterization lab for revascularization in a different region of his leg – this time to restore blood circulation to his heel. Unlike the initial procedure, the second time around was fraught with complications, including kidney failure, brought on by his diabetes. He spent about two months in the ICU.

"The complications were not related to the surgery at all, but the good thing is that I was off my feet while I was in the intensive care unit (ICU)," says Getson. He praises his medical team for the excellent care he received and gives credit to his son for inspiring him to get through that trying time.

"My goal was to get better to see him on the baseball field," Getson says. "This kid literally watched me go through the best of times and the worst of times. He has a firm concept of, 'Daddy, take care of yourself; I don't want to see you go through this again.'"

**FRANK GETSON (RIGHT) WITH HIS SON HESH, WHO JOINED HIM ON A RECENT VISIT TO MOUNT SINAI'S VASCULAR CENTER**

suffers from diabetes, developed a chronic diabetic ulcer on his left heel. The ulcer was so severe that he had to have his leg amputated below the knee.

Diabetes is a risk factor for accelerated hardening of the arteries or atherosclerosis and peripheral artery disease (PAD), a circulatory problem that decreases the flow of blood to the extremities. Although symptoms vary, PAD warning signs may include pain, cramping, tingling or numbness in the legs or feet. People with PAD also are more likely to develop stubborn wounds or ulcers and severe infections. The narrowed arteries make it harder for blood to reach the wound and promote healing. Left untreated, the wounds can become so severe that the limb must be amputated.

Last October, Getson found himself battling four wounds on his right leg. He called his longtime friend, Dr. Frank Tursi,

## PAD: WHO IS AT RISK?

Factors that increase your risk of developing PAD include:

- Smoking
- Diabetes
- Obesity
- High blood pressure
- High cholesterol
- Increasing age, especially after reaching 50
- A family history of PAD, heart disease or stroke

# NEW WOMEN'S CENTER WILL OPEN SOON AT THE MOUNT SINAI AVENTURA CAMPUS

PATIENTS CAN LOOK FORWARD TO GREATER PRIVACY, COMFORT AND CONVENIENCE WHILE RECEIVING EXCELLENT MEDICAL CARE

This fall, Mount Sinai Medical Center will inaugurate a beautiful new Women's Center in Aventura. The center will feature a spa-like environment coupled with advanced diagnostic technology and highly-skilled radiologists.

Located at 2845 Aventura Boulevard, Suite 145, the Mount Sinai Aventura Women's Center will provide a variety of screening and diagnostic services, including mammograms, breast ultrasound and ultrasound-guided procedures using advanced digital imaging technology. Pelvic and obstetric ultrasounds and bone densitometry with fat absorption detection capabilities also will be available, as well as computerized tomography (CT) and open MRI scans, and all forms of X-rays.

The center is being built with an emphasis on privacy and comfort, with a dedicated waiting area and dressing room for patients seeking a mammogram, as well as a coffee bar and refreshment area. It will feature a warm, inviting setting designed to

put patients at ease during their visit.

Mount Sinai offers comprehensive breast care at two convenient locations, Miami Beach and Aventura. Together, the two centers provide a full range of screening, diagnostic, counseling and support services to combat breast cancer, the second leading cause of death among women. Mount Sinai's Miami Beach comprehensive breast center was the first facility in Florida to receive accreditation from the National Accreditation Program for Breast Centers. It also is recognized as a Breast Imaging Center of Excellence by the American College of Radiology.

In addition, Mount Sinai's Women's Centered Care program offers a team approach to treatment and services, which sets it apart from other facilities in the region. A multidisciplinary team of specially trained physicians who understand the health care needs of women work together to optimize women's health and well-being, and coordinate care across specialties. In

addition, a patient navigator is available to assist patients in accessing any needed services.

Mount Sinai Medical Center Offers Comprehensive Breast Care Services at Two Convenient Locations:

## MOUNT SINAI AVENTURA WOMEN'S CENTER

2845 Aventura Boulevard, Suite 145  
Aventura, FL 33180  
305.932.4766

## LILA AND HAROLD MENOWITZ COMPREHENSIVE BREAST CENTER

Mount Sinai Comprehensive Cancer Center

# MOUNT SINAI MEDICAL CENTER IMAGING SPECIALISTS

PROVIDING OUTSTANDING WOMEN'S CENTERED DIAGNOSTIC IMAGING SERVICES

## STUART S. KAPLAN, M.D.

*Section Chief of Breast Imaging  
Vice Chairman of the Department of Radiology*

A member of Mount Sinai's medical staff since June 2007, Dr. Kaplan completed his radiology residency at the University of California, Los Angeles (UCLA) and his fellowship training at the Iris Cantor Center for Breast Imaging at UCLA.

## KATRINA RABINOVICH, M.D.

*Attending Physician*

Dr. Rabinovich joined Mount Sinai's medical staff in January 2009. She completed her residency in radiology at the University of Tennessee Methodist Hospital. Dr. Rabinovich also completed a fellowship in women's imaging, abdominal imaging and interventions, and general and obstetric ultrasound at Brigham and Women's Hospital in Boston.

## NEELIMA REDDY, M.D.

*Attending Physician*

A member of Mount Sinai's medical staff since August 2010, Dr. Reddy completed her residency in diagnostic radiology, with advanced training in body/women's imaging and a fellowship in breast imaging at Mount Sinai Medical Center.

## IVY SALOM, M.D.

*Attending Physician*

Dr. Salom completed her residency in diagnostic radiology at the University of Puerto Rico School of Medicine and a fellowship in breast imaging at Mount Sinai before joining the hospital's medical staff in July 2012.

# MEDICAL EXCELLENCE PERSONIFIED

MEET THREE MEMBERS OF OUR MEDICAL STAFF — ALL OF WHOM ARE LEADERS IN THEIR FIELD OF EXPERTISE AND EMBODY OUR COMMITMENT TO MEDICAL EXCELLENCE.

## ROY F. WILLIAMS, M.D.

### SPECIALTY

- Thoracic and Cardiovascular Surgery

### RESIDENCIES

- State University of New York/Kings County Hospital Center, General Surgery
- State University of New York/Kings County Hospital Center, Cardiothoracic Surgery

### SNAPSHOT

Dr. Williams is chief of Mount Sinai's Division of Thoracic Surgery. One of the nation's leaders in video-assisted thoracic surgery (VATS), as well as robotic-assisted lung and thoracic surgery, he has been practicing thoracic surgery in South Florida for approximately two decades. Dr. Williams also is a pioneer in utilizing minimally invasive techniques in the early diagnosis and comprehensive treatment of lung cancer. Minimally invasive surgery typically involves two to four small incisions between the ribs, compared to the six- to 10-inch incision that is customary with traditional thoracic surgery. As a result, patients experience less pain, fewer complications, shorter hospital stays and a faster recuperation. Board certified in thoracic and cardiac surgery, Dr. Williams is a fellow of the American College of Surgeons.

## YVONNE KOCH, M.D.

### SPECIALTY

- Urology

### RESIDENCY

- Case Medical Center (University Hospitals Of Cleveland), Urologic Surgery

### FELLOWSHIP

- University of Texas Southwestern Medical Center, Female Pelvic Medicine, Reconstructive Surgery and Neurourology

### SNAPSHOT

Raised in Miami, Dr. Koch (pronounced Cook) is board certified by the American Board of Urology. She also holds subspecialty board certification in Female Pelvic Medicine and Reconstructive Surgery. She has been in practice since 2008. A native Spanish speaker, Dr. Koch is fluent in both English and Spanish. She is a member of the American Urologic Association (AUA), Florida Urologic Society, Southeastern Section of the AUA and the Society of Women in Urology.

## ELIZABETH ANNE OUELLETTE, M.D.

### SPECIALTY

- Orthopaedics, Hand Surgery

### RESIDENCY

- University of Washington School of Medicine, Orthopaedics

### FELLOWSHIP

- University of Miami Miller School of Medicine, Hand Surgery

### SNAPSHOT

Dr. Ouellette has 28 years of experience as a hand surgeon in Miami. She spent 22 years with the University of Miami. She was chief of the university's hand surgery department and director of the hand fellowship program at Jackson Health System for two decades. Dr. Ouellette's research interests in hand and upper extremities include biomechanics of wrist instability, repair of injured nerves, skin coverage and psychological interventions for upper extremity trauma patients. Her research efforts have resulted in 15 book chapters, more than 30 peer reviewed articles and numerous presentations at academic meetings all over the world.

# PLEASE WELCOME THE NEWEST MEMBERS OF OUR FAMILY...

We are proud to salute the people who have joined our family of philanthropists from February 15, 2014 to July 14, 2014. By embracing our Foundation, they are demonstrating a commitment to Mount Sinai Medical Center and its pledge to provide great medicine for our community. We extend our heartfelt gratitude to all of our donors – those who are new to the family and those who have been with us through the years – for their generosity.

# Save the Date

## OCTOBER 15

## KEY TO THE CURE Kick-Off Celebration

**Saks Fifth Avenue**  
Bal Harbour  
9700 Collins Avenue

Saks Fifth Avenue Bal Harbour is once again partnering with The Mount Sinai Comprehensive Cancer Center to host Key To The Cure, a charity shopping weekend that will take place October 16 through October 19. During the weekend, 2 percent of participating vendor sales from Saks Bal Harbour will be donated to the Mount Sinai Comprehensive Cancer Center.

Admission to the kick-off party is \$25 with 100 percent of the admission proceeds also benefitting Mount Sinai.

# MOUNT SINAI MEDICAL CENTER FOUNDATION

# LEVELS OF GIVING

### THE SOCIETY OF MOUNT SINAI

The Society represents the Foundation's highest level of giving, with the level of membership based on a donor's cumulative history of support. These levels include:

Member.....	\$150,000
Fellow.....	\$250,000
Benefactor .....	\$500,000
Humanitarian.....	\$1 million
Visionary .....	\$2.5 million
Doctor of Philanthropy .....	\$5 million or more

### THE FOUNDERS

The Founders Club is Mount Sinai's most time-honored organization and one whose membership is part of a valued tradition in our community. With a pledge of \$50,000, individuals and organizations make a commitment to provide sustained support for Mount Sinai's programs.

### YOUNG FOUNDERS

The Young Founders include individuals who join the Founders Club and are less than 50 years of age. With a pledge of \$50,000, Young Founders have the flexibility of moving freely within the Founders and Young Presidents Club.

### YOUNG PRESIDENTS CLUB

The Young Presidents Club was established in 1973 for individuals 25 to 45 years of age who seek a venue for social and business networking, while fulfilling their desire to support a worthwhile charity. With a pledge of \$10,000, young philanthropists are welcomed into this organization.

### LEGACY CIRCLE

Membership in the Legacy Circle is reserved for donors who make a planned gift of \$50,000 or more to the medical center. Their support helps to ensure that future generations have access to quality medical care.

### COMMUNITY PARTNERSHIP PROGRAM

This program Mount Sinai Medical Center Foundation creates a philanthropic bond between the medical center and local businesses, such as hotels and restaurants. Partners ask their patrons to make a small gift – ranging from 25 cents to \$1 per transaction – in support of emergency, cardiac, cancer, neonatal, Alzheimer's or charity care at Mount Sinai.

**STIPULATION AND [PROPOSED]  
ORDER TO FILE FIRST AMENDED  
COMPLAINT**

Dept: C-65  
Judge: Hon. Ronald F. Frazier

Complaint Filed: August 4, 2021  
Trial Date: Not yet set

***"IMAGED FILE"***

18 Plaintiff DEEPAK MOORJANI ("Plaintiff") and Defendants GULAB MOORJANI,  
19 SEEMA MOORJANI, SUNIL MOORJANI, and ZUBEIDA MOORJANI (hereinafter,  
20 "Defendants"), though their counsel, hereby stipulate as follows:

21 1. WHEREAS, on August 4, 2021, Plaintiff filed a Complaint to: (a) Quiet Title; (b)  
22 Cancellation of Instrument; and (c) Partition and Forced Sale;

23 2. WHEREAS, the parties met and conferred regarding Defendants' intended demurrer  
24 to the Complaint;

25 3. WHEREAS, Plaintiff has agreed to file a First Amended Complaint no later than  
26 November 23, 2021;

27 4. WHEREAS, as a result of Plaintiff's agreement to file a First Amended Complaint,  
28 the parties agree that Defendants have no obligation to respond to the Complaint.

1           5.       The parties agree that the execution of this stipulation shall not constitute a waiver of  
2 any party's rights, interests or remedies relating to the prosecution or defense of the above action.

3           6.       The parties agree that the execution of this stipulation shall not be construed as an  
4 admission of liability on the part of Defendants, or any of them, as to any portions of the Complaint  
5 or First Amended Complaint.

6           7.       This stipulation may be executed electronically and electronic signatures may be used  
7 in lieu of originals.

8           SO STIPULATED.

Hon. Ronald F. Frazier, Judge of the Superior Court

**PROOF OF SERVICE**

I am a resident of the State of California, over the age of eighteen years, and not a party to the within action. My business address is PROCOPIO, CORY, HARGREAVES & SAVITCH LLP, 525 "B" Street, Suite 2200, San Diego, California 92101. On October 25, 2021, I served the within documents:

**STIPULATION AND [PROPOSED] ORDER TO FILE FIRST AMENDED COMPLAINT**

☐ **BY U.S. MAIL** by placing the document(s) listed above in a sealed envelope with postage thereon fully prepaid, in the United States mail at San Diego, California addressed as set forth below. I am readily familiar with the firm's practice of collection and processing correspondence for mailing. Under that practice it would be deposited with the U.S. Postal Service on the same day with postage thereon fully prepaid in the ordinary course of business. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date or postage meter date is more than one day after date of deposit for mailing an affidavit.

☐ **BY ELECTRONIC MAIL SERVICE** based upon court order or an agreement of the parties to accept service by electronic transmission, by electronically mailing the document(s) listed above to the e-mail address(es) set forth below, or as stated on the attached service list and/or by electronically notifying the parties set forth below that the document(s) listed above can be located and downloaded from the hyperlink provided. No error was received, within a reasonable time after the transmission, nor any electronic message or other indication that the transmission was unsuccessful.

☒ **BY ELECTRONIC SERVICE (via One Legal Online Court Services):** I served upon the designated recipients via electronic transmission through the One Legal system on October 25, 2021. Upon completion of said transmission of said documents, a certified receipt is issued to filing party acknowledging receipt by One Legal's system. Once One Legal has served all designated recipients, proof of electronic service is returned to the filing party.
